# B JAYASREE

**Software Engineer**

+91 6309937311 jayasree1830@gmail.com LinkedIn Portfolio | Github Bengaluru

## SUMMARY

Software Engineer with 2+ years of experience building production full-stack and AI-powered applications using Next.js, React, TypeScript, Node.js, Python (FastAPI), and SQL. Currently building ERP modules with Amazon and Shopify integration and an AI Copilot on a multi-LLM backend with cost-efficient query routing. Previously improved UI performance by 30% through AWS S3 and Core Web Vitals optimization, cut release cycles by ~50% with CI/CD, and integrated Amazon Cognito in a microservices architecture. Skilled in AWS (S3, EC2, RDS), REST APIs, i18n, and Agile/Scrum.

## WORK EXPERIENCE

**Software Engineer - UnknwnAI Ltd** **July 2026 – Present**

Project: **ERP Application** — Amazon & Shopify Integration Platform

Contributing to a production ERP in Next.js and TypeScript, building end-to-end modules (HR, warehouse, suppliers, customers, work orders), integrating **Amazon and Shopify** APIs for real-time order and inventory sync, and an **AI Copilot** for natural-language queries.

- Contributing to a live **ERP platform integrating Amazon and Shopify** marketplaces, building end-to-end modules with Next.js and TypeScript, including UDF (user-defined fields) and configurable item setups for platform extensibility.
- Built the complete **HR module**: employee management, **payroll and payslip generation**, leave management, and **role-based access control (RBAC)**.
- Building an **AI Copilot** for warehouse, supplier, customer, and **work order** modules: a conversational **chatbot** that answers natural-language queries on orders, customers, and inventory. Designed a **multi-LLM backend** (currently **OpenAI GPT**) with **intelligent query routing**: structured data lookups go directly to backend **FastAPI** and only open-ended prompts go to the LLM, which **reduces token usage and API cost**.

**Software Engineer - JOOLA INDIA Pvt Ltd** **July 2024 – July 2026**

Project: **racketpro.org** — Advanced Pickleball coaching & certification platform

Developed and maintained scalable full-stack applications using Next.js, Node.js, and SQL — delivering core business modules on time and ensuring platform stability in a live production environment.

- Improved UI performance by **30%** by migrating static assets to **AWS S3**, implementing SVG-based assets, and applying **Core Web Vitals** optimizations — directly improving page load speed and SEO rankings.
- Designed and built a full-stack **Audio Lesson module (Next.js + Node.js + AWS S3)** end-to-end — enabling cloud audio storage, playback, and full admin content management from scratch.
- Engineered **RESTful APIs** for **4+ core platform modules** (Notifications, Question Registry, Coach Payments, Newsletter) using Node.js and **PostgreSQL**.
- Built and enhanced the **Final Exam** and **Lesson Management** systems, improving exam flow reliability and admin panel usability.
- Implemented **multilingual (i18n)** support across web app and **50+ email templates**, expanding platform reach to **4+ international markets**.
- Developed **filtered CSV export** functionality across **6+ Admin Panel modules**, reducing manual data extraction effort for operations teams by **~3 hours/week.**

- **Automated build**, testing, and deployment via **CI/CD pipelines** — cutting release cycle time by **~50%** and enabling reliable weekly deployments with minimal manual intervention.
- Built an **AI-powered Chatbot** in React, integrating a custom **LLM model** via **VAPI** to enable real-time conversational interactions — handling both the frontend UI and API orchestration end-to-end.
- Partnered across design, QA, and operations teams in an Agile/Scrum environment — maintaining a **high-quality** production codebase across **3 projects**, including **2 admin portals**, with concurrent feature releases; authored **unit test**s using **Jest** to ensure code reliability.

### Other Projects

**JOOLA North America Teams & 150+ Health (Next.js, Node.js)**

- Delivered a full-stack Authentication module (Login, Registration, OTP Verification) with **Amazon Cognito** integration in a **microservices architecture**, plus reusable Navbar/Footer UI components.
- Implemented **ADA/WCAG** accessibility compliance and backend modules for Activity Tracking and Profile Details with app-wide encryption and decryption.

## TECHNICAL SKILLS

- **Frontend:** Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML5, CSS3
- **Backend:** Node.js, Express.js, Python, FastAPI, REST API Development, PostgreSQL, SQL, Database Integration
- **Cloud & Storage**: AWS, Amazon S3, Amazon EC2, Amazon RDS, Amazon Cognito
- **Integrations**: Amazon Integration, Shopify API, ERP Systems, Third-Party API Integration, Order & Inventory Sync
- **Tools & Workflow:** Git, GitHub, Bitbucket, JIRA, CI/CD, Agile, Scrum, Internationalization (i18n)
- **AI Tools:** Claude AI, Cursor AI, VAPI, Large Language Models (LLM), OpenAI GPT, Multi-LLM Integration, AI Copilot / Chatbot Development

## EDUCATION

**Bachelor of Engineering — Computer Science (CSE)** **2020-2024**
Jawaharlal Nehru Technological University

## CERTIFICATIONS

**Prompt Engineering —** Udemy
**Cloud Computing —** NPTEL
**Forward Deployed Engineering (FDE) —** Udemy
